

Pixel Paper - 400 ;
Graph Paper for Screen Coord

circle that goes over moon at
almost full opacity, outline at lower
opacity like the moon's glow is passing
through

opacity = alpha "a"

Draw.SetFillColor(r, g, b, a);

Shadow over moon is controlled by cursor
but only the x axis so the circle
moves on a straight line

Draw.Circle(Input.GetMouseX(), y, radius);

Shadow needs to be same colour as sky
so it can't be seen when not on moon

Shadow outline lower opacity

Shadow also slightly smaller than moon
to reveal moon's out line

↳ hopefully make
a glowing effect

Triangle (x₁, y₁, x₂, y₂, x₃, y₃):
corner1 corner2 corner3

↳ 2 triangles to make a star

phases of the moon

400x400

New Moon

Waxing Crescent

First Quarter

Waxing Gibbous

Full Moon

Waning Gibbous

Last Quarter

Waning Crescent

New Moon

As the mouse moves across the x axis
a moon on screen changes

? Extra: when shadow not
on moon (full moon) special
effect? Stars shine
brighter?
